Product Description

390watt 23.5kg Bifacial Solar Panels BSCI Monocrystalline Solar Panel Kit For Charging

The 390 Watt Bifacial Solar Panels, weighing 23.5 kg, feature advanced monocrystalline technology and BSCI certification for high efficiency and quality. Designed to capture sunlight from both sides, these panels significantly boost energy output, making them ideal for charging applications. Suitable for residential, commercial, and industrial use, they utilize reflected light to maximize power generation. Their robust and durable construction ensures long-term reliability and performance. This solar panel kit is a perfect solution for reducing electricity costs and promoting sustainable energy.

Product Features:

1)Higher efficiency

With the ability of capturing sunlight from both sides,our product of bifacial solar panel can provide up to 21,96% more efficient compared with the common solar panel.

2)Easy to install and use

The pre-drilled holes on the back of the panel make it quick to mount on the roof or other situation.

3)Advanced Technology

As one of the most efficient solar technologies in the industry,HJT technology can make products less affected by changes in temperature. Bifacial products pass more sunlight up to 95%.
