

## Lightweight And Easy To Install 100w 12v Semi Flexible Solar Panel For Car Boats

### **Basic Information**

Place of Origin: ChinaBrand Name: LinksunCertification: CE

Model Number: LS-SF100M
 Minimum Order Quantity: 100pcs
 Packaging Details: 2 pcs/carton
 Delivery Time: 5-8days

• Payment Terms: 30% TT in advance, 70% balance before

delivery

Supply Ability: 1000pieces per week

## **Product Specification**

Product Name: Flexible Solar Panels

• Solar Cell: Monocrystalline Silicon Cells

Application:
 RV, Boat And Yacht, Van And Car, Outdoor

Camping

• Dimensions: 980\*580\*2mm

Benefits: High Efficiency, More Flexibility, Higher

Toughness

Back Sheet: White
Warranty: 5 Years
Protection Class: IP65
Front Material: ETFE

Output Cables: Photovoltaic Technology Cable 4.0 Mm²

Highlight: Easy Install Semi Flexible Solar Panel,

100w Semi Flexible Solar Panel, 12v Semi Flexible Solar Panel

# Lightweight and easy to install 100w 12v semi-flexible solar panel for car boats

This lightweight and easy-to-install 100W 12V semi-flexible solar panel is perfect for cars and boats. Its semi-flexible design allows for versatile mounting on curved surfaces, while maintaining high efficiency in energy conversion. Durable and weather-resistant, it ensures reliable performance even in challenging conditions. Ideal for those seeking a portable and efficient renewable energy solution, it provides a sustainable power source for all your on-the-go needs.

#### **Product Features:**

- 1.Efficiency: Monocrystalline cells are known for their high efficiency and better performance in low-light conditions compared to polycrystalline and thin-film panels. This means you get more power output per square meter.
- 2.Flexibility: Semi-flexible panels can bend up to 30 degrees, making them ideal for irregular surfaces. This flexibility is achieved without compromising the performance or the durability of the solar cells.
- 3.Durability: These panels are designed to withstand harsh conditions. They are typically coated with a durable, weather-resistant material such as ETFE (Ethylene Tetrafluoroethylene) or PET (Polyethylene Terephthalate), which protects the cells from moisture, dust, and UV rays.
- 4.Lightweight: Semi-flexible solar panels are lighter than traditional rigid panels, which makes them easier to transport and install. This is especially beneficial for applications where weight is a critical factor.

### Specifications

1.Power Output: 100 watts 2.Dimensions: 980 x 580 x 2 mm

3.Weight: 1.6kgs

4.Operating Temperature: -40°C to +85°C

5.Warranty: 10 years for product

### FAQ:

Q1: What's the solar panels warranty?

A: 5 year's warranty. If you have any questions about our quality during use, you can contact us at any time.

Q2: Do you accept OEM/ODM orders?

A:We accept OEM/ODM orders.Welcome your inquiry.

Q3: Can I have samples to test?and what's the lead time for the sample order?

A:Yes,of course.The lead time for samples is 7-10 days.

Q4: Are you manufacturer or a trading company?

A:We are manufacturer and our factory is based in Yuyao, Ningbo. Welcome your visit if you like.

Q5: Where are your goods exported? A:We can export to all over the world.
